About us

- ✓ LogiCoy provides integration & Composite applications business solutions for customers and partners.
- ✓ LogiCoy has experienced technology team members who have over 25 years of experience architecting and developing integration products for Sun , SeeBeyond, NCR, Teradata, SWIFT, IBM and AT &T
- ✓ LogiCoy has experienced solutions and implementation team members with Over 20 Years of experience for the most prestigious and large HealthCare Institutions and insurance companies.
- ✓ We build production ready components for Open ESB platforms like GlassFish ESB.
- ✓ We provide integration , porting and implementation services for Sun Java CAPS, GlassFish ESB & SeeBeyond ICAN and eGate Suites.
- ✓ We provide integration Solutions for HealthCare , SWIFT, User Provisioning and data warehousing.

Our Products

- ✓ LogiCoy develops binding Components for Open ESB project.
- ✓ We take request from Customers who need Components for their specific integration needs.
- ✓ We develop and take requests for integration solutions using binding components we provide and those that are available in the Open ESB Project.
- ✓ Some Components & Solutions currently under development :
 - ✓ HL7 BC, MQ BC, IMS BC, and SAP BC
 - ✓ HealthCare B2B Gateway.

Our Services

- ✓ LogiCoy provides architecture and integration engineering for critical business initiatives.
- ✓ We have expertise on SeeBeyond eGate, and ICAN Suites, Sun Java CAPS and GlassFish ESB and provide upgrade and readiness assessment.
- ✓ We provide technical Account Management for integration projects on Sun and SeeBeyond, including Roadmap definition, SOA Assessment, Strategy and Legacy modernization.
- ✓ We do proof of concepts and Migration
- ✓ We help in technology evaluation and selection.
- ✓ We provide implementation and installation and maintenance services.
- ✓ We offer support services that meets your requirements.

Our Solutions

- ✓ LogiCoy develops solutions that are suited for the Healthcare and Insurance industry's integration and composite applications projects.
- ✓ Our solutions are proven to work in large installations and are configurable.
- ✓ We develop and take requests for integration solutions using binding components we provide & those that are available in the Open ESB project as well custom EJBs and Java libraries.
- ✓ We develop gateways and web services to bridge proprietary Identity systems to OpenLDAP.
- ✓ We develop and enhance Identity, Authorization and Security into IHE Profiles.

Solution: HL7 B2B Gateway

- ✓ Receive HL7 (v2.x) data from multiple lab partners, transform to XML and send to other parties. Also, update data warehouse in MySQL
- ✓ Incoming data can be PGP decrypted and outgoing data can be PGP encrypted
- ✓ Data can be sent/received via FTP or Web Services. SFTP support was requested but deferred to future. Waiting for completion of SFTP support.
- ✓ Supports data transformation/test code/... mapping/data enrichment...
- ✓ Supports process management, error handling, and email notification on both incoming and outgoing data/transport
- ✓ Built exclusively using GF ESB + released components + LogiCoy EJBs

Solution: Product Catalog Loader – Mall Application

- ✓ Process multiple large XML files (2-48 Gigs) from Amazon containing products data into multiple tables in MySQL DB that supports a mall application with store fronts. The tables have multi-dimensional FK relationships/constraints and are organized in online catalogs.

Solution: Wellness Points Generator

- ✓ Members data is feed daily to the database from an FTP location.
- ✓ Members use Heart rate monitors and Pedometers for capturing their daily activities.
- ✓ Heart rate monitor captures the member's max, min and average heart rate. Pedometer captures their every step.
- ✓ The application receives such workout data from those devices.
- ✓ Based on the workouts data, it calculates if the member is eligible for receiving points.
- ✓ Receiving points for the member's activities will make the members eligible for various health benefits.
- ✓ Completely developed using GlassFishESB components

LogiCoy's Global Presence
